# **2023 Accounting Higher Finalised Marking Instructions**

© Scottish Qualifications Authority 2023

These marking instructions have been prepared by examination teams for use by SQA appointed markers when marking external course assessments.

The information in this document may be reproduced in support of SQA qualifications only on a non-commercial basis. If it is reproduced, SQA must be clearly acknowledged as the source. If it is to be reproduced for any other purpose, written permission must be obtained from [permissions@sqa.org.uk](mailto:permissions@sqa.org.uk).

## General marking principles for Higher Accounting

*Always apply these general principles. Use them in conjunction with the specific marking instructions, which identify the key features required in candidates' responses.*

- (a) Always use positive marking. This means candidates accumulate marks for the demonstration of relevant skills, knowledge and understanding; marks are not deducted for errors or omissions.
- (b) If a candidate response does not seem to be covered by either the principles or specific marking instructions, and you are uncertain how to assess it, you must seek guidance from your team leader.
- (c) Always follow through consequentiality subsequent to a calculative error and give credit for any errors in subsequent calculations or working.
- (d) Mark scored out or erased working which has not been replaced, where still legible. However, if the scored out or erased working has been replaced, mark only the work which has not been scored out.
- (e) For **describe** questions, candidates must make a number of relevant factual points, which may be characteristics and/or features, as appropriate to the question asked. These points may relate to a concept, process or situation. Candidates may provide a number of straightforward points or a smaller number of developed points, or a combination of these.

Up to the total mark allocation for this question

- award **1 mark** for each relevant factual point
- award **1 mark** for any further development of a relevant point, including exemplification when appropriate

- (f) For **identify** questions, candidates must name a number of relevant items or facts. These must relate to the context of the question and do not need to be in any particular order.

Up to the total mark allocation for this question

- award **1 mark** for each relevant identification

- (g) For **justify** questions, candidates must give good reasons to support suggestions or explain the reason(s) for or against the issue raised in the question. A development point can be given.

Up to the total mark allocation for this question

- award **1 mark** for each accurate justification

- (h) For **outline** questions, candidates must make a number of brief statements appropriate to the question asked. These may include facts, features or characteristics

Up to the total mark allocation for this question

- award **1 mark** for each accurate statement

- (i) For **state** questions, candidates must list a number of relevant items or facts. These must relate to the context of the question and do not need to be in any particular order.

Up to the total mark allocation for this question

- award **1 mark** for each relevant item or fact

MAX MARK 4

1 mark for each overhead variance calculation and identification of over/under absorption

If overheads absorbed figure not based on overhead absorption rates calculated in 2.A (c), do not award marks

- 2.A (e) (i) Describe why some overhead costs can be allocated to departments, while others require to be apportioned to departments.  
Allocation of a cost occurs when overheads can easily be identified and traced to a specific department. (1)  
Apportionment of a cost occurs when the cost relates to the business as a whole, rather than individual departments. (1)

MAX MARK 2

- 2.A (e) (ii) Other methods of absorbing overheads.  
Rate per direct labour hour  
Rate per unit produced  
Rate as a percentage of direct labour  
Rate as a percentage of prime cost

MAX MARK 2

1 mark per correctly identified method  
Do not award factory-wide absorption rate

MAX MARK 8

ADDITIONAL GUIDANCE

If new Contribution per Unit has not been calculated, therefore Contribution per kg, order of priority and quantity of each product to be produced is based on original Contribution per Unit figures, max 5 marks

Award 2 marks for all 3 correct, 1 mark for any 2 correct  
Do not award if contribution per labour hour is calculated

1 mark for Product C and Product A allocations

MAX MARK 2

2. PART B

2.B (c)

Factor when deciding to accept or reject a Special Order.

Does it increase or decrease the profit?

Is there spare capacity in the factory?

Is the contribution for the special order higher than the item with the lowest contribution per limiting factor?

Does the Special Order make a contribution to Fixed Costs?

Does the spare capacity need to be used for normal production?

Could accepting the special order lead to an increase in future regular contracts?

MAX MARK 2

Any one point for 1 mark

3. (a)

4.A (c) Accounting Rate of Return

**Advantages**

It is easy to understand and simple to calculate. (1)

It draws attention to the overall profit. (1)

It is compatible with a similar accounting ratio. (1)

**Disadvantages**

Profit for the year can be subject to different variations. (1)

The timings of the cash inflows are ignored (1) which ignores the time value of money. (1)

No guidance is given as to what is a good acceptable rate of return. (1)

The benefit of high profits in the early years is not accounted for. (1)

Where time scales are different, this method is unreliable. (1)

ARR is not suitable for comparing projects with different investment amounts. (1)

MAX MARKS 2
