## **Marking Instructions**

---

Please note that these marking instructions have not been standardised based on candidate responses. You may therefore need to agree within your centre how to consistently mark an item if a candidate response is not covered by the marking instructions.

## Section 1

| Question |  |  | Generic scheme                                                                                                                                                                                        | Illustrative scheme                                                                                                                                                                                                                  | Max mark |
|----------|--|--|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| 1.       |  |  | <ul style="list-style-type: none"> <li>•<sup>1</sup> use the discriminant</li> <li>•<sup>2</sup> apply condition and simplify</li> <li>•<sup>3</sup> determine the value of <math>k</math></li> </ul> | <ul style="list-style-type: none"> <li>•<sup>1</sup> <math>3^2 - 4 \times k \times (-4)</math></li> <li>•<sup>2</sup> <math>9 + 16k = 0</math> or <math>9 = -16k</math></li> <li>•<sup>3</sup> <math>-\frac{9}{16}</math></li> </ul> | 3        |

| Question |  |  | Generic scheme                                                                                                                                                         | Illustrative scheme                                                                                                                                                            | Max mark |
