I have taken the 95th percentile hand length and span from adult male, but I will need to allow additional clearance room for the hands to fit.

The grip size has been taken from 5th percentile adult female to allow all employees to grip the product to handle it.

I have taken the 5th percentile adult female elbow height to ensure the product is accessible for all employees.

Specification

The specification should include key points from the brief and research to detail the requirements of the proposal.

It should clarify aspects such as aesthetics, function, ergonomics, performance, and cost.
