General marking principles for Higher Music Technology

This information is provided to help you understand the general principles you must apply when marking candidate responses to questions in this paper. These principles must be read in conjunction with the detailed marking instructions, which identify the key features required in candidate responses.

(a) Marks for each candidate response must always be assigned in line with these general marking principles and the detailed marking instructions for this assessment.

(b) Do not accept any answer that is not in the marking instructions. Use professional judgement when candidates' responses do not exactly match marking instructions but carry the same meaning.

(c) Where a question asks for a description, explanation or justification, do not award marks for simple one or two word answers.

(d) Accept inaccurate spelling of English or Italian terms, as long as the meaning is clear.
