

1 Functions f and g are defined on the set of real numbers by

- $f(x) = x^2 + 3$
- $g(x) = x + 4$

(a) Find expressions for:

- (i) $f(g(x))$;
- (ii) $g(f(x))$.

- ³ ic complete second composite

- ¹ e.g. $f(x+4)$ **stated, or implied by** •²
- ² $(x+4)^2 + 3$
- ³ $x^2 + 3 + 4$

3

Notes

- Candidates must clearly identify which of their answers are $f(g(x))$ and $g(f(x))$; the minimum evidence for this could be as little as using (i) and (ii) as labels.
- Candidates who interpret the composite functions as either $f(x) \times g(x)$ or $f(x) + g(x)$, do not gain any marks.

Regularly occurring responses

Response 1 : The first two marks are for **either** $f(g(x))$ **or** $g(f(x))$ correct. The third mark is for the other composite function.

Notes

3. Candidates who use $f(x) \times g(x)$ can gain no marks in (b) as a cubic will be obtained.
4. Candidates who use $f(x) + g(x)$ do not gain •⁴ (eased) but •⁵ and •⁶ are available as follow through marks.
5. In method 1, any other formula masquerading as a discriminant cannot gain •⁵ and •⁶.
6. •⁴, •⁵ and •⁶ are only available if $f(g(x)) + g(f(x))$ simplifies to a quadratic expression of the form $ax^2 + bx + c$, with b and c both non-zero.
7. •⁶ is only available for a numerical value, calculated correctly from the candidate's response at •⁴, and leading to no real roots.
8. Do not accept for •⁶:
 - 'no roots' in lieu of 'no real roots'
 - 'maths error' or 'ma error'.

Notes

- ⁷, •⁸ and •⁹ are only available if a quadratic equation is obtained at •⁶ stage.
- Candidates may express the quadratic equation at the •⁶ stage in the form $3s^2 + s - 2 = 0$. For candidates who do not solve a trigonometric quadratic equation at •⁷ $\sin x$ must appear explicitly to gain •⁸.
- ⁷, •⁸ and •⁹ are not available to candidates who 'solve' a quadratic equation in the form $ax^2 + bx = c$, $c \neq 0$.
- For •⁹ there must be one valid solution, and one solution outwith interval which is rejected.
- ⁹ is not available to candidates who leave their answer in degree measure.
- Cross marking is available for •⁸ and •⁹.
